Appendix D. Research / Project Manuscript Outline - BSIT

- **Title Page**
- **Approval Sheet**
- **Dedication** (free form)
- **Acknowledgement**
- **Executive Summary** or **Abstract**
- **Table of Contents** (strictly use MS Word Table of Contents feature)
- **List of Figures**
- **List of Tables**
- **List of Notations (**optional**)**
- **Chapter I – Introduction**
    - Project Context
    - Purpose and Description of the Project
    - Objectives of the Project
    - Scope and Limitations of the Project
- **Chapter II – Review of Related Literature**
    - Related Literature / Theoretical Background
    - Related Studies
- **Chapter III – Technical Background**
    - Technicality of the project (explained in paragraph form)
    - Details of the technologies to be used
    - How the project will work
- **Chapter IV – Methodology**
    - Environment
        - Locale
        - Population of the Study
        - Organizational Chart/Profile (of the organization/ beneficiary)
    - Requirements Specifications
        - Operational Feasibility
            - Fishbone Diagram (the cause and effect)
            - Functional Decomposition Diagram
        - Technical Feasibility (specifications/ of equipments)
            - Compatibility checking (hardware / software and other technologies)
            - Relevance of the technologies
        - Schedule Feasibility
            - Gantt Chart (plans of the system SDLC)
        - Economic Feasibility
            - Cost and Benefit Analysis (paragraph)
            - Cost Recovery Scheme (benefits/ times to wait to get the benefits)
        - Requirements Modeling (screen layouts)
            - Input
            - Process
            - Output
            - Performance
            - Control
            - Either of the following two (2) or combined, whichever are applicable:
                - Data and Process Modeling
                    - Context Diagram
                    - Data Flow Diagram
                    - System Flowchart
                    - Program Flowchart (highlights only)

        - Object Modeling
            - Use Case Diagram
            - Class Diagram
            - Sequence Diagram
            - Activity Diagram
    - Risk Assessment/Analysis
- Design
    - Output and User-Interface Design
        - Forms
        - Reports
    - Data Design
        - Entity Relationship Diagram (preferably done in MS Access [but MS Access is discouraged as DBMS])
        - Data Dictionary
    - System Architecture
        - Network Model
        - Network Topology
        - Security
- Development
    - Software Specification
    - Hardware Specification
    - Program Specification
    - Programming Environment
        - Front End
        - Back End
    - Deployment Diagram
    - Test Plan
- Testing
    - Unit Testing
    - Integration Testing
        - Compatibility Testing
        - Performance Testing
        - Stress Testing
        - Load Testing
    - System Testing
    - Acceptance Testing (must be done after the Oral Defense)

- **Conclusions**
- **Recommendations**
- **Implementation Plan**
    - Project Implementation Checklist
    - Implementation Contingency
    - Infrastructure/Deployment
- **BIBLIOGRAPHY**
- **APPENDICES**
    - Relevant Source Code
    - Evaluation Tool
    - Sample Input/ Output/Reports
    - Users Guide
    - Other Relevant Documents
    - Working Title Form
    - Grammarian's Certification
    - Curriculum Vitae
- **GLOSSARY**
